## Organising Chairman of Scientific Conference

**Assoc. Prof. Dr. Santhosh Kotian**

MAHSA University, in collaboration with the Malaysia Dental Industry Association (MDIA), is proud to jointly present MIDS 2024. With the 7th edition of MIDS, our continued collaboration stands as a testament to our mutual ambition and dedication to uplift the standards of dental science and practice. Reflecting on the growth of our partnership over the years, we're filled with gratitude and excitement for the milestones we've achieved and those yet to come.

This year we are targeting to accommodate a staggering 1,500 delegates, 1.5 times larger than our reach from the previous year. This expansion is more than just a testament to our growth; it's an emblem of the increasing global interest and significance of this monumental show.

MIDS 2024 promises an exploration into the forefront of dental technology, combined with profound insights from world-renowned speakers and a comprehensive view into both the contemporary trends and the visionary future of dentistry. Our meticulously curated programmes will continue to address essential issues and breakthroughs in dental and oral healthcare through plenaries, symposia, and workshops.

Be prepared to dive into stimulating debates, immerse yourself in groundbreaking knowledge sessions, and build lasting connections with peers from across the globe. MIDS 2024 isn't just an event—it's a transformative experience.

Mark your calendars, be a part of this vibrant confluence, and let's co-create history in the realm of dental exhibitions in Malaysia!

## Message by

# Organising Chairman of Exhibition

---

## Mr. Sree Vela

Greetings from the 7th Malaysia International Dental Show 2024!

We are filled with immense pride and enthusiasm as we gear up for our event slated for 15th May to 17th May 2024, Wednesday to Friday. The MIDS team, alongside our esteemed stakeholders, eagerly awaits these dynamic three days. Your unwavering support and engagement are what make this gathering the pivotal dental event in Malaysia.

Continuing the momentum from previous years, we are thrilled to once again have our exhibition on weekdays, allowing for broader participation and engagement from industry professionals. Building upon our past successes, we anticipate MIDS 2024 to be our largest yet, expecting a remarkable turnout of 2,000 visitors and 1,500 delegates.

Our theme remains resonant: *"Building Dental Technology Advancement Through Sustainability & Humanity."* We stay committed to the principles of sustainability, exemplified by our digital Buyer's Guide and our steadfast "no plastic" initiative. This year, we further fortify our commitment by introducing initiatives that underscore the importance of both sustainable practices and technological advancements in the dental domain. Furthermore, our alignment with the national oral health policy demonstrates our dedication to creating a more integrated and holistic approach to dental health.

Beyond being a mere exhibition, MIDS is a nexus for innovation, product launches, and unparalleled networking opportunities. We cordially invite you to engage, collaborate, and be a part of this crescendo of progress and innovation.

## Message by

# Dean of the Faculty of Dentistry, MAHSA University & Advisor of MIDS 2024 Scientific Conference

## **Prof. Dato' Dr. Mohamed Ibrahim Abu Hassan**

I am extremely delighted to witness the synergy between MAHSA University and MDIA in presenting MIDS, a paragon of excellence that serves not only as an expo of the latest in dental technology but also as a nurturing ground for budding talents and future leaders in the field.

Our commitment to education and academia is unwavering, and MIDS plays a pivotal role in this journey. The platform it offers is unparalleled, bridging the gap between theoretical knowledge and real-world advancements, between students and global experts, and between the present and the future of dental care.

Every iteration of MIDS presents an opportunity - a chance for students and researchers to immerse themselves in groundbreaking innovations, to partake in rigorous academic discussions, and to mold their aspirations with hands-on experiences. We firmly believe in the power of such integrative learning to shape and elevate future talents.

MIDS has always been more than just an exhibition. It's a celebration of constant evolution, where academia meets industry, fostering an environment that benefits the broader community. We understand the importance of melding fundamental and applied sciences to usher in holistic advancements in oral health and wellness.

As we gear up for the scientific conference at MIDS 2024, I am confident it will continue its tradition of inspiring delegates with the latest technological marvels and research developments in oral healthcare. Moreover, it presents a golden opportunity to forge global connections, expanding horizons beyond national borders.

The concerted efforts of MAHSA & MDIA in orchestrating the scientific conference and exhibition are commendable. I hold high hopes for MIDS 2024 and fervently believe that, as we culminate this gathering, we'll emerge with broader perspectives, enriched knowledge, and renewed vigor for our shared mission.

Here's to forging paths, building bridges, and shaping the future. Looking forward to a successful MIDS 2024!

## Message by

# Asia Pacific Dental Industry Association (APDIA) President

## MA. Lourdes Jimenez Villaroman

Mabuhay!

It's with great pleasure and pride that I extend my warmest congratulations to MDIA and its esteemed members on the successful opening of the 7th Malaysia International Dental Show (MIDS 2024).

This momentous occasion marks not only a significant milestone for the Malaysian dental industry but also a testament to the dedication, vision, and hard work of the Malaysia Dental Industry Association (MDIA) and its members. The remarkable growth and success of MIDS over the years stand as a shining example of the commitment to excellence and innovation within the dental community.

APDIA, as a collaborative alliance formed with the noble aim of fostering unity and development in the dental industry across the Asia Pacific region, takes immense pride in witnessing the continued success of MIDS. Since its inception, APDIA has strived to facilitate bilateral support in continuous professional learning, the regional exchange of technologies, business ideas, and talent, as well as aiming towards cross-border cooperation for harmonization of Medical Device Registration.

The journey of APDIA, sparked by the visionary invitation from MDIA to NADTI and TDTA in 2017 and 2018 respectively, has been one of growth, collaboration, and shared achievements. Today, APDIA stands as a symbol of unity and progress, comprising dental industry associations from 5 countries and corporate members from 2 countries. Officially registered under the Registrar of Society of Malaysia in 2023, APDIA remains steadfast in its mission to expand its influence and impact throughout the Asia Pacific region.

As we celebrate the success of MIDS 2024, let us also acknowledge the invaluable role that APDIA has played in contributing to this achievement. Through our collective efforts and shared goals, we have not only supported the growth and success of MIDS but also paved the way for future collaboration and advancement within the dental industry.

Once again, congratulations on the successful opening of MIDS 2024! May this event serve as a catalyst for further innovation, collaboration, and growth within the Malaysian dental industry and beyond.

## Message by

# Honorary Advisor of MIDS 2024

## Prof. Dr. Kacharaju Kranthi Raja

It is with a deep sense of honor and responsibility that I stand before you today. Over the years, my journey in the realm of dental academia has reinforced a belief I hold dear: the noble pursuit of knowledge. Education, in my view, is more than just an accumulation of facts and skills; it's the driving force that propels industries forward, ushering in advancements that benefit society at large.

When we speak of the dental industry, this symbiosis between knowledge and practice becomes even more critical. Our field is an amalgamation of precision, innovation, and, most importantly, the aspiration to improve oral health for all.

As I gaze upon this gathering of esteemed traders and academicians, I'm filled with hope and excitement. Our collaboration has the potential to introduce innovations and methodologies that could reshape our industry's landscape. It's my earnest wish that through our combined efforts, we not only advance our industry but also bring about a significant, robust improvement in local oral health.

Let MIDS 2024 be the platform where we unite, share our knowledge, and collaboratively pave the way for a brighter, healthier future.

Thank you for being here, and I look forward to the incredible journey we're about to embark on together.

## Message by

# Malaysia Dental Industry Association (MDIA) President & Advisor of MIDS 2024 Exhibition

## Mr. Desmond Chong Yoong Fatt

Welcome to the distinguished 7th Edition of MIDS 2024!

At the Malaysia Dental Industry Association (MDIA), we continually set new benchmarks in fostering an ecosystem that is beneficial for our stakeholders, encompassing an ever-evolving landscape of knowledge and business growth. For half a decade, we have taken pride in organizing the Malaysia International Dental Show (MIDS), establishing it as the paramount dental exposition in Malaysia with unmatched footfalls.

One of the profound truths we've come to appreciate is the symbiotic relationship between academia and the dental industry. As technologies advance, so must our methods, practices, and teachings. It is this interweaving of academic rigor and scientific innovation that promises a brighter future for dental care in our nation and beyond.

MIDS 2024 is not just an event, but a testament to the spirit of collaboration and collective growth. In maintaining the profound theme, "*Building Dental Technology Advancement Through Sustainability & Humanity*", we emphasize our commitment to an eco-conscious future and salute the relentless pursuits of experts that drive this industry forward. MDIA remains dedicated to aligning with global aspirations, emphasizing sustainable advancements that are grounded in humanistic values.

On behalf of the dedicated team at MDIA and our partners at MAHSA, I earnestly invite you to be part of the event. By forging resilient partnerships and synergies, we can sculpt a future where the dental industry isn't just dynamic, but also inclusive, sustainable, and ever-progressive.

Together, let's shape a promising future for the dental industry.

# SHOWCASING OUR INTERNATIONALLY RENOWNED SPEAKERS

Scientific Conference Topic:

## Facial Attractiveness and Orthodontics Treatment

Dr. Stephen Chu

Malocclusion can cause distortion of the face, therefore producing an unattractive face. This presentation will provide method with proper differential diagnosis, control biomechanics of the force system and the understanding of the cephalometric parameters can properly position teeth that can increase the facial attractiveness, function, balance of the soft tissues, and help in setting for future restoration which the patient might need.

### Speaker Intro

Dr. Stephen Chu practices Orthodontics in Dallas, TX. Comprehensive orthodontic treatment includes metal wires that are inserted into orthodontic brackets, which can be made from stainless steel or a more aesthetic ceramic material. The wires interact with the brackets to move teeth into desired positions. Being advanced in the field, Dr. Chu may also use Invisalign or other aligner trays that have been designed to align a patients? smile.

As an orthodontist, Dr. Chu must recognize various characteristics of a malocclusion or dentofacial deformity, define the nature of the problem, including the etiology if possible, and design a treatment strategy based on the specific needs and desires of the patient.

Scientific Conference Topic:

## Shaping The Future of Endodontic with Bioceramic

Prof. Dr. Carlos Murgel

Endodontics, the branch of dentistry focusing on the study and treatment of dental pulp and periradicular tissues, has witnessed a transformative paradigm shift with the emergence of bioceramic materials.

This abstract explores the revolutionary impact of bioceramics on the field, highlighting their unique properties and their potential to redefine the landscape of endodontic therapy.

Bioceramics, characterized by their biocompatibility, bioactivity, and durability, have emerged as a promising alternative to traditional materials in endodontic applications. One of the key advantages lies in their ability to create a bioactive environment that fosters tissue regeneration and healing. The interaction between bioceramics and the host tissues promotes cell adhesion and proliferation, contributing to enhanced clinical outcomes and prolonged success rates in endodontic treatments.

Furthermore, bioceramics exhibit superior sealing properties, reducing the likelihood of bacterial ingress and reinfection. This not only enhances the predictability of endodontic procedures but also extends the lifespan of treated teeth. The versatility of bioceramics allows for their application in various aspects of endodontics, from root canal filling materials to perforation repairs, demonstrating their adaptability to diverse clinical scenarios.

The abstract also delves into the futuristic prospects of bioceramics in endodontics. Ongoing research explores the incorporation of advanced technologies, such as nanotechnology, to further enhance the properties of bioceramic materials. Additionally, the development of smart bioceramics with responsive features holds promise for real-time monitoring of treatment outcomes, providing clinicians with valuable insights into the healing process.

In conclusion, the integration of bioceramics into endodontic practice represents a transformative journey towards improved patient outcomes and the longevity of dental interventions. This abstract underscores the pivotal role of bioceramics in shaping the future of endodontics, offering a glimpse into the exciting possibilities that lie ahead for clinicians, researchers, and patients alike.

Scientific Conference Topic:

## Shaping The Future of Endodontic with Bioceramic

Prof. Dr. Carlos Murgel

### Speaker Intro

Dr. Carlos Murgel is one of the leaders of the Brazilian Endodontia, formed for the FORP-USP in 1987 with Residence in Endodontia for the University of the Iowa-USA in 88-89 and Doutorado in Endodontia for the FOP-UNICAMP in 2001.

Professor of Endodontia and Microscopia Operatoria of the Sao Paulo Association of the Surgeons Dentists, Association of the Surgeons Dentists of Campinas and the Pacific Endodontic Research Foundation (Cause).

Its clinic has a highest level of excellency with national and international recognition, therefore it searches for the constant overcoming of the current scientific standards technician. He develops and uses the most modern available technologies in the market.

Scientific Conference Topic:

## Functional Orthodontics Master Keys to Expand Your Orthodontic Practice

Dr. Olivier Setbon

Since 90% of the adult face is built by the age of 11, the conference will focus on functional appliances used for malocclusions diagnosed in children aged 3 to 10. In teenagers, Gugino's principle applies: "The later you treat, the more your concept will have to adapt itself to the patient's face"

Already in 2002, the French High Authority for Health reported a recurring problem: relapse. To limit or even avoid relapse, we need to go beyond DDM, which is only a symptom. We must carry out the investigation to know who our patient is as a whole: I am talking about functions, dysfunctions and parafunctions. By going beyond the malocclusion, we give a chance to our patient to have a much better maxillofacial growth, a functional and aesthetic dentition cherry on the cake: stability.

This is what we'll be demonstrating in the morning with clinical cases.

### Speaker Intro

Dr. Olivier Setbon studied at the University of Paris Descartes: he obtained his Doctorate in Dental Surgery in 1996, then his diploma of Qualified Specialist in Dento-Facial Orthodontics (CECSMO) in 2005.

In 2006, he became a University Hospital Assistant. Finally, in 2010, he obtained a University Diploma in Lingual Orthodontics.

Since 2002, Dr. Setbon has been based in Villepinte (Seine Saint Denis) and has developed an additional practice in Auxerre (Burgundy) since 2012.

He is also a lecturer at the University of Paris 6, University of Paris-Evry, University of Dijon and for the EOMAC, Practitioner trained in the Invisalign technique since 2007 and with home aligners since 2017.

International lecturer for Orthopius and Henry Schein (formerly for Invisalign) but also for the industry.

Scientific Conference Topic:

## Comprehensive Endodontic Management of Complex Cases: A Clinical Approach

Prof. Dr. Kacharaju Kranthi Raja

This Presentation explores modern strategies in the endodontic management of complex cases, encompassing challenges such as intricate canal anatomy, extensive periapical pathosis, and failed previous treatments.

Accurate diagnosis, aided by cone-beam computed tomography, forms the foundation for successful intervention. Meticulous canal cleaning, shaping, and obturation techniques, facilitated by advanced tools, address anatomical variations. Retreatments, crucial in the face of compromised prior endodontic work, will be discussed, emphasizing obturating material removal and disinfection. This presentation with a lot of clinical cases highlights the dynamic nature of endodontics in effectively managing complexities for improved patient outcomes.

### Speaker Intro

Professor Dr. Kranthi Raja Kacharaju is a graduate of the Manipal University, India. He completed the postgraduate program in Conservative Dentistry and Endodontics at NTR University of Health Sciences, India. He has 18 years of academic and clinical experience. He is currently serving as an adjunct Professor at Saveetha University Chennai.

AP. Dr. Kranthi has been serving as Deputy Dean at the Faculty of Dentistry, MAHSA University past 5 years and has also been appointed as a senate member at MAHSA University. His knowledge and teaching skills in the field of restorative dentistry are well appreciated. He lectures nationally and internationally.

Dr. Kranthi is passionate about Endodontics and Restorative dentistry. He has delivered keynote lectures and conducted many workshops across Germany, Egypt, Taiwan, Singapore, Vietnam, Philippines, Dubai, Korea, Malaysia and India. He also has been the organising chairman for the Malaysia International Dental Show for the past 4 years. He is been a reviewer and member of the Editorial board of the Journal of Conservative Dentistry, and the Journal of Orofacial Sciences,

He has published articles in various reputed international Journals. His research interest is in the field of magnification, instrumentation, disinfection and obturation techniques.

Scientific Conference Topic:

## Not Just White Lines!

Dr. Bogdan Moldoveanu

When one thinks of endodontics, one often thinks of the shaping procedure. The mechanical treatment of root canals has always been a key part when it comes to innovation in endodontics, especially in the last few years with the advent of heat-treated NiTi instruments. Apart from being an intensely studied aspect of endodontics, the shaping procedure is one of the most challenging steps of any endodontic treatment. Hence, it is only normal that the dentist should desire a feasible and easy-to-use instrument that can get the job done safely and predictably.

Now more than ever, the number of new files appearing on the market is overwhelming. Many rotary systems appear every year. So, how do the various systems differ? How does one decide which to use? How do practitioners know whether their decision was the correct one? This is exactly what this course will discuss.

The analysis will focus on every step of the shaping procedure, from pre-flaring to creation of the glide path and all the way to the apical finishing. We will explore the limits of different instruments to understand how we can adapt our protocols to any given anatomy so that there will not be a scenario in which we are not able to successfully finish the treatment.

Participants will not learn how to obtain white lines on periapical radiographs during this course; instead, they will learn about the relevant scientific and medical principles, equipping them such that they leave the room already looking forward to starting their next endodontic treatment.

Scientific Conference Topic:

## Not Just White Lines!

Dr. Bogdan Moldoveanu

### Speaker Intro

Dr. Bogdan Moldoveanu DMD, MSc graduated from the Faculty of Dental Medicine at "Iuliu Hatieganu" University of Medicine and Pharmacy of Cluj-Napoca, Romania, and then he continued his Post-Graduate studies in Endodontics in Italy, at the Dental School of the University of Turin. Here he successfully graduated from the Post-Graduate Master course in "Clinical and Surgical Microendodontics" 2nd level.

He is an international member of the Spanish Association of Endodontics (A.E.D.E), a certified member of the European Society of Endodontists (A.A.E). He is the CEO of the educational platform "Endodontics with Passion", opinion leader for ORODEKA but also works with many other dental companies such as Woodpecker, Fotona, Septodont and many others. He holds the title of Assistant Professor at the University of Turin at the Post-Graduate Master course in "Clinical and Surgical Microendodontics"- Master program fully taught in English and the title of Visiting Professor for the Master in "Clinical and Surgical Microendodontics" at the UCAM Universidad Católica San Antonio de Murcia, Naples (Italy) division.

He holds a Certificate in Dental Implantology. He undertakes his clinical activity in Baia-Mare, Maramures, Romania working in a private clinic, focusing mainly on surgical and nonsurgical micro endodontics". Dr. Bogdan Moldoveanu had the pleasure of sharing his passion for endodontics with hundreds of people as an invited speaker at many conferences and congress in countries such as Italy, Germany, Croatia, Lithuania, UAE, Greece, Hungary, Poland, Czech Republic, Slovakia, Slovenia, Finland, Bulgaria, Moldavia and Romania.

Scientific Conference Topic:

## The Best Orthodontic Methods Fit for Different Stages of Life

Dr. Chang-Ok Oh

In this presentation, we aim to explore orthodontic treatment methods tailored to different stages of life: childhood, adolescence, adulthood, and the elderly. In childhood, early interventions aim to address dental and skeletal issues, promoting optimal growth. During adolescence, the focus is on aligning teeth and jaws, seeking both aesthetic improvements and functional enhancements.

Adult orthodontics encompasses various options, including treatments involving surgical correction, to address both cosmetic considerations and functional improvements. For the elderly, specialized orthodontic care is necessary, considering age-related changes such as tooth wear and bone density loss. Through this lecture, we seek to emphasize the importance of orthodontic treatment at various life stages, aiming to explore specific treatments that ensure optimal oral health and comprehensive well-being from childhood to old age.

### Speaker Intro

Graduate from Yonsei Univ. Dental College D.D.S., M.S.D., Ph.D. Intern, Resident Dept. of Orthodontics Yonsei Univ. Dental College Clinical professor, Dept. of Orthodontics Yonsei Univ. College of Dentistry Visiting professor Dept. of Orthodontics Univ. of Southern California, USA Former president of the Korean Association of Lingual Orthodontists Former Vice president of the Korean Association of Digital Orthodontists Co-president of Scientific Committee, 8th Congress of World Society of Lingual Orthodontics (WSLO 2019) Chief, SmileZone Orthodontic Center.

Dr. Chang-Ok Oh is currently a chief of SmileZone Orthodontic Center and a clinical professor at the Department of Orthodontics, Yonsei University, Seoul. He is also a visiting professor at the Department of Orthodontics, University of Southern California (USC), CA, USA. Dr. Oh has been using Mini-screws on various cases since 1996 and has given various presentations throughout the world related to mini-screws, lingual orthodontics and surgical orthodontics.

Dr. Oh is one of the pioneers in developing mini-screws and he pursued to find the most efficient and simplified treatment mechanics in his daily orthodontic practice. He has served as a president of Korean Association of Lingual Orthodontists (KALO), and vice-president of Korean Association of Digital Orthodontists (KADO).

Scientific Conference Topic:

## Versatility and Possibilities of Using The Chairside System In A Minimal Invasive Protocol

### Dr. Daniel Baketić

Digital technology in dentistry is rapidly evolving and this improves our daily workflow routines. CAD-CAM chairside systems are one of the most beneficial. Its superiority and ease of use result in a much more predictable and accurate final restoration.

Covering a broad spectrum of indications while also avoiding multiple appointments not only simplifies everything for the dental office but the patient with a simple digital intraoral scan experiences an easy treatment. The concept of a one-day treatment is becoming a standard benchmark in dentistry. Full ceramics and composites have proven as the best material of choice along with the designing software that allows us to be predictable, and accurate in a very short time frame.

#### Learning Objectives:

- Simple protocol in dental CAD-CAM systems - from scanning to milling.
- Indications for one-day patient treatment.
- Choice of material.

#### Speaker Intro

Doctor Daniel Baketić is a professional with over 20 years of work experience in restorative dentistry. He is a certified member, chairperson of ESCD, and a member of the Expert Council of the Croatian Dental Chamber. Fellowship in International Academy for Dental Facial Esthetics.

Owner and Director of Center for Aesthetic Restorative Dentistry and Dental Implantology (Esthetic Dental Center) in Zagreb. Active in organizing educational programs and lecturing minimally invasive restorative and digital dentistry.

He is an Opinion leader and educator for numerous companies (ArtTech, Dentsply Sirona, Sprinray). He has always had a passion and is inspired by new technologies focusing on minimally invasive dentistry.

Scientific Conference Topic:

## Navigating The Dynamics of Behavior, Anxiety, and Communication In Modern Dentistry

Assoc. Prof. Dr. Annapurny Venkiteswaran

Attendees will embark on a journey through the intricate interplay of patient behavior, anxiety, and effective communication within the contemporary dental practice. This lecture delves into the latest insights and strategies for understanding and managing diverse patient behaviours, addressing anxiety-related challenges, and fostering open and empathetic communication.

From cutting-edge techniques to create a more comfortable environment to communication tools that enhance patient trust, this presentation equips dental professionals with practical approaches to optimize the patient experience. Join us for a dynamic exploration of the psychological landscape in dentistry, where knowledge meets compassionate care for the benefit of both patients and practitioners.

### Speaker Intro

Dr. Annapurny graduated from University Malaya, Kuala Lumpur in 2002. She completed her Clinical Masters In Paediatric Dentistry in 2010 and also obtained a Membership of Faculty of Dental Surgery, England in 2008.

She is a trained clinical hypnotherapist and obtained her Diploma in Hypnotherapy from London College of Clinical Hypnosis in 2015. She has also completed a PGDip in the field of Health Economics from the University of South Wales in 2020.

Dr. Annapurny is currently an Associate Professor at the Faculty of Dentistry, UiTM and is actively involved in teaching and research. Area of interest includes Dental Traumatology, Craniofacial Anomalies and Hypnosis.

She currently holds the position of Vice President of the Malaysian Society of Clinical Hypnosis (MSCH) and the Editor-In-Chief for Malaysian Journal of Paediatric Dentistry. She also serves on the Social Media Committee for the International Association of Dental Traumatology.

Scientific Conference Topic:

## How Er, Cr: YSGG Laser Debond Veneers - Unveiling The Secret

Dr. Ibrahim Samir

Veneers became a prosthetic solution to enhance smile. And by rising this treatment option, the demand of replacing veneers also raised. During veneers removal, preserving the underlying enamel integrity is very crucial. Conventionally veneers were removed by different mechanical techniques. But those techniques could easily jeopardize the underlying enamel integrity, and cause patient discomfort.

Here comes Er,Cr:YSGG laser to solve this dilemma by its ability to debond ceramic veneers safely through resin cement ablation. The laser mechanism of action in veneers debonding will be explained in detail. And the different techniques of veneers debonding will be proposed. Also, cases presentation will be showed, to demonstrate the debonding technique utilized in debonding of 4000 veneers safely and conservatively. Furthermore, veneers debonding by laser could offer the intact retrieval of veneers for repair, then the ability of recementing them again successfully.

### Speaker Intro

Dr. Ibrahim received his bachelor's degree of Oral and dental medicine (B.D.S) from Misr international university in Cairo - Egypt. He accomplished his Mastership of Laser Therapy in Dentistry program in Aachen dental laser center (AALZ), RWTH Aachen university - Germany in 2016. Also successfully certified as a laser safety officer from (AALZ) in 2016. He became a fellow of World Academy for Laser Education in Dentistry (WALEd) in 2016 and a member of International Society for Laser Dentistry (ISLD) organization since 2019.

Dr. Ibrahim successfully inaugurated the dental laser center of DR. Nour dental clinics in Cairo, Egypt and he is the director of this dental laser center since 2017. He has been practicing laser dentistry since 2017 and specialized in dental esthetical treatments utilizing laser technology.

Dr. Ibrahim initiated a laser dentistry continuing educational program in Dr. Nour Academy in 2020, training 30 candidates yearly. He shares knowledge in laser science as a speaker with colleagues on a yearly basis in the ISLD congress.

Scientific Conference Topic:

## Digital Pathways In Rehabilitation of Complex Restorative Situations

Prof. Dr. Anandakrishna G N

Today the combination of Dental implants and Digital dentistry is evolving into an exemplary duet where we are able to attempt and restore complex situations which was very difficult in earlier times.

Maxillo facial rehabilitation with advanced implantology has contributed greatly to improve quality of lives of patients with deformities. The predictability and quick execution with the help of digital technologies today has become an integral part of rehabilitation.

This presentation will present case scenarios where digital technologies like intraoral scanner, Facial scanner, Cad cam production, 3d printing, medical modelling and many other technologies have improved quality of care for patients.

### Speaker Intro

Dr. Anandakrishna G. N. (Sr Prosthodontist & Implantologist) Dr. Anandakrishna G N is a highly regarded Prosthodontist and Implantologist who specializes in complex restorative protocols and implantology. He obtained his dental degree from the Govt. Dental College in Bangalore and completed his MDS in Prosthodontics at the AB Shetty Memorial Institute of Dental Sciences in Mangalore. Dr. Anandakrishna holds the distinction of being the first Board Certified Prosthodontist from the Indian Board of Prosthodontics and is also a Diplomat of the ICOI.

Throughout his career, Dr. Anandakrishna has been actively involved in academia, serving as a Professor at the MS Ramaiah Dental College in Bangalore. He has held various positions in national and international organizations, including Secretary of the Indian Board of Prosthodontists, Secretary of the Indian Prosthodontic Society in Bangalore, Ambassador of the ICOI, and Vice President of the Indian Prosthodontic Society. He has also been involved with the Karnataka Prosthodontic Society, served as the Scientific Coordinator for ICOI in South Asia, and been an Executive Council Member of IPS. Dr. Anandakrishna is the founder of My Dental Plan Healthcare, 3 dent DDS, and the Implant Study Group. He has received extensive training in Crown & Bridge and Implantology, with a wealth of experience in implant prosthodontics using various implant systems. His expertise and contributions have made him a respected figure in the field.

Scientific Conference Topic:

## Addressing The Challenges of Orthodontic Iatrogenic

Dr. Romeo Jacob

PHILIPPINES

Orthodontics has gone through remarkable advances and for those who practice it with dignity and clinical quality, a predictable and successful results is ensured. With the unprecedented number of patients treated in various set-up (general dental practice vs specialty office) some type of iatrogenic problems (post-treatment root resorptions, occlusal plane changes; midline discrepancies, asymmetries, periodontal diseases, etc.) arises.

Several questions may raise useful reflections about the constant increase of iatrogenic. What is causing it? Does it occur when dentists are properly trained? In legal terms, how can dentists accept these patients? How should they be orthodontically treated? What are the most common problems? The objective of the presentation is to analyze and discussed relevant aspects to understand patients with iatrogenic problems and describe a simple and efficient approach to treat complex cases associated with orthodontic iatrogenic while pre and post treatment cases will be highlighted.

### Speaker Intro

Dr. Jacob received his Doctor of Dental Medicine from University of the East, Ramon Magsaysay Memorial and Medical Center in Quezon City, Philippines (8th Place) and holds a Postgraduate Certificate of Clinical Proficiency in Orthodontics at the Ludwig's Maximillian University in Munich, Germany. Presently an orthodontic consultant for the Hong Kong Dentists Association, Thai Dental Association and Vietnam Dental Association. He is a former faculty of the University of the East College of Dentistry in Manila at the Department of Orthodontic and Pediatric Dentistry.

A former Training Officer and consultant for the Pediatric Dentistry Division at the Philippines Children's Medical Center, where he heads the cleft lip and cleft palate division of the same hospital preparing infant patients with clefts for future surgery and orthodontic intervention.

At present, Dr. Jacob is as an International Service Professor for South East Asia giving lectures to dental universities and colleges in Hong Kong, Thailand, Vietnam, Laos and Cambodia and a speaker of the Philippines Dental Associations Speaker's Bureau. He holds his exclusive private practice in Orthodontics and Pediatric Dentistry in Manila and is actively involved in providing orthodontics trainings to dentists and orthodontists in the Philippines and abroad. Her is the director of Prime Orthodontics Studies and Training, Inc., an accredited Continuing Professional Education provider of the Professional Regulations Commission.

Scientific Conference Topic:

## Implant Surgery or 'Smile' Surgery

Dr. Jeanette Chua Keng Ling

Dental implants penetration rate into the dental industry is increasing at an exponential rate over the last 20 years since its inception nearly 60 years ago. However, the technology of implants, techniques and how we deliver care have been evolving so quickly to make life easier for dentists to place implants and yet often surgeons are too quick in placing them without having a full picture.

With the advancement of technology, this lecture will discuss how treatment planning can be done at a much more controlled level and we can be more predictable in our outcomes nowadays. Having a beautiful smile and being able to masticate well is still the original purpose of implants; thus how do we ensure that happens for patients. In addition, what are the main benefits with technology and how do we find the balance; the difference of traditional and digital ways of practice will be illustrated. How do we practice in private practices where it is the most efficient way to keep up with time will be discussed.

### Speaker Intro

Dr Jeanette Chua obtained her Bachelor of Dental Science degree from The University of Melbourne and began practicing dentistry in Singapore immediately after. She subsequently returned to Australia to further her practice while completing a Master in Applied Commerce. She later did a preceptorship program in Implant Dentistry at the Implant Department of Loma Linda University School of Dentistry (LLUSD) in California, USA. This was followed up with specialty training in Advanced Periodontology and Implant Surgery, and a Master in Advanced Periodontology.

She is a member of the American Academy of Periodontology and also a Diplomate of the American Board of Periodontology. She established Encia Dental Specialist, a private practice limited to Periodontology and Implant Surgery in Kuala Lumpur, Malaysia in 2008. She later founded Artius Dental Group in 2015, in partnership with a team of like-minded practitioners, with the aim of providing quality dental treatment through responsible dentistry and ethical patient care. This was followed with the formation of Ancora Imparo, a dental continuing education platform that strives to deliver high caliber dental continuing education for dentists in Asia.

She lectures mainly in periodontal therapy and implant therapy both locally and internationally. Currently, she is the immediate past President of APSO, and also current Section chair of south east Asia for ITI.

Scientific Conference Topic:

## Spotlight: Perio-Ortho Issues Resolved

**Dr. Regina Isabel Morales**

PHILIPPINES

There is an interesting and complicated relationship between orthodontics and periodontics. Many orthodontic cases start during adolescence age. Many reap or suffer the result of their orthodontic experience as they become adults later in life. Therefore, treatment planning is crucial to sustain or improve the overall periodontal condition for the patient long term. Gingivitis and periodontitis, must be identified and should be controlled prior to any commencement of orthodontic treatment. Different perio-ortho issues will be discussed to avoid or prevent errors in treatment. Questions on stripping teeth to gain space, controlling periodontal disease, presence of mucogingival deformities, gingival recessions, importance of attached gingiva, forced eruption as a pre implant preparatory procedure to avoid complicated bone grafting procedures will be shown.

Hand in hand, orthodontist and periodontist should work together to achieve the optimal results to meet the expectations and demands of patients with compromised dentitions.

### Speaker Intro

Dr. Regina Isabel Santos-Morales, is a certified periodontist practicing at the St. Luke's Medical Center Global City in the Philippines. She graduated top 3 in her class from the University of the Philippines, College of Dentistry in 1992 and placed 2nd at the Philippine Dental Board Examination of that year. In 1993, she was accepted at the University of Pennsylvania School of Dental Medicine where she received her Certificate of Periodontics in 1995. After her postgraduate studies, she was invited to become a teaching fellow at the Department of Periodontics. From 1994 to 1996, she was a clinical instructor and full-time lecturer of the Periodontology in their undergraduate program. And in 1996, she continued her training in Implant Dentistry through the Nobel Biocare Implant Fellowship also in the University of Pennsylvania School of Dental Medicine Implant Center. She was the very first foreign trained dentist to be accepted in this extensive implant fellowship (that only accepts one fellow per year). Upon her graduation, she was awarded these 3 distinguished awards, namely, Director's Award, Chace Scholarship Award and Coslet Scholarship Award given to the most outstanding student.

Dr. Morales is a Diplomate of the American Board of Periodontology and Philippine Board of Periodontology. She is the FIRST Filipino Diplomate of the American Academy of Periodontology to practice in the Philippines. Also, she is an active member of the Philippine Dental Association and is listed in its Speaker's Bureau. She is part of the Core group of the Philippine Society of Periodontology that seeks to teach and spread the specialty of Periodontics in the Philippines. She also has several published articles in the European Journal of Esthetic Dentistry. Dr. Morales generously shares her knowledge by giving lectures on new trends and techniques and is devoted to the advancement of the profession especially in the field of Periodontics and Implant Dentistry in the Philippines.

Scientific Conference Topic:

## Practical Approaches In Dental Treatment Planning for Geriatric Patients

MALAYSIA

Dr. Siti Zaleha Hamzha

Formulating a dental treatment plan for geriatric patients especially those with multiple co-morbidities may require a sound understanding of the impact of aging on the general well-being and its association with the changes in oral soft and hard tissues.

It is equally essential to consider other confounding factors such as socioeconomic situation, access to the healthcare facilities, family support and the surrounding environment in managing this vulnerable group of population. Dental treatment that is categorized as a gold standard for a particular condition may not be suitable for the elderly patients with the same condition.

A well informed dental practitioner will make the best treatment decision based on their holistic clinical judgement. Therefore, this lecture will be focusing on such approach in order to formulate an effective treatment plan for elderly patients to allow them to dentally/orally function in their environment and overall needs. A few clinical cases will be presented to enhance the understanding of the participants in the topic discussed.

### Speaker Intro

Dr. Hamzah is a Specialist in Special Care Dentistry (SCD) at the Ministry of Health Malaysia (MOH), where she has served as the National Head since 2011 and the Head of Department at Kajang Hospital. She has played a key role in establishing SCD units nationwide, promoting awareness, and contributing to professional education through various seminars and workshops.

Dr. Hamzah has been involved in research, written and reviewed articles for the MyHealth Portal, and served as an interviewer for MOH scholarship candidates, chair of the Postgraduate Dental Programs assessment panel, and board member at local universities. She has presented at several national and international conferences, including the iADH conferences in Melbourne, Berlin, and Dubai.

My current project and has been fully supported financially by MOH is the inclusion of Conscious Sedation for Dentistry as part of the component provided by SCD service.

Scientific Conference Topic:

## Types of Indirect Restorations and The Preparation Designs: Adhesive VS Mechanical Retentions

Dr. Yeoh Oon Take

Different types of indirect restoration designs, ranging from single crown, multi-unit prosthesis and adhesive bridge will be illustrated and the design rationale for various clinical scenarios will be discussed.

The presentation will also emphasise on the tooth preparation design to maximise the retention of indirect restoration on tooth, in a scenario where dental adhesive alone is inadequate for predictable long-term retention.

In the situation where a bonded indirect restoration can benefit a patient, material selection and application techniques will be discussed to optimise the outcomes.

### Speaker Intro

Dr Yeoh is a Prosthodontist with focus of interest in implant prosthodontic, bonded indirect restoration, dental material and digital dental technologies. Currently he works full time in University of Malaya and part time in private practice in East and West Malaysia:

He obtained a Malaysian government scholarship to pursue his specialist training and obtained a Doctor of Clinical Dentistry in Prosthodontics degree from The University of Melbourne. He was recently being admitted as a member of the Royal Australasian College of Dental Surgeons in the specialist dental practice of prosthodontics and a registered Prosthodontic Specialist with New Zealand Dental Council.

Due to his strong research interest in dental materials and dental implants, Dr Yeoh has been working closely with various dental industry partners and has presented in local and international platforms.

Scientific Conference Topic:

## The Lost Art of Occlusion In Clinical Practice

Dr. Noor Addeen Abo Arsheed

The practice of occlusion has traditionally been very difficult to learn and understand. As a result, an undesirable mystique has been built around it that has intimidated a considerable part of the dental profession. It is now more important than ever that dental practitioners familiarise themselves with a practice that so intimately affects their daily professional careers.

Restorative treatment outcome is highly dependent on the occlusion of the restoration when the treatment is complete and therefore sound up-to-date knowledge of all evidence-based aspects of this commonly encountered condition is essential. Dentists usually have very limited practical clinical experience in occlusion and most of the references available for them are theory-based resources.

This presentation will discuss a series of everyday clinical situations in occlusion that may be encountered in general dental practice, to promote effective clinical management and to help clinicians be more confident to overcome common clinical challenges related to occlusion.

### Speaker Intro

Dr Noor Addeen completed his Bachelor of Dental Surgery in 2005 and later continued to receive his speciality in Prosthodontics and Masters Degree in 2010. He was trained under leading Prosthodontic Rehabilitation specialists such as Prof Dr Joseph Massad in the United States of America and Prof Matthias Kern in Germany.

He has more than 18 years of clinical and teaching experience in the field of Prosthodontics and General Dental Practice. He is currently a senior lecturer in Faculty of Dentistry in MAHSA University, a fellow of Pierre Fauchard Academy (USA) and a constituent member of International College of Prosthodontics.

Scientific Conference Topic:

## Oral Rehabilitation In Early Childhood Caries

Dr. Nazatul Sabariah Ahmad

Dental caries remains a major public health problem globally despite the overall decline in more developed countries, imposing a considerable economic burden on healthcare services.

This biofilm-mediated, diet-modulated multifactorial disease significantly affects disadvantaged social groups and is prevalent among school-aged children. Dental caries, if it remains untreated, causes pain and infection and therefore may affect physical and psychological developments.

This lecture will guide the audience on the oral rehabilitation methods of the early childhood caries at an appropriate age.

### Speaker Intro

Dr. Nazatul Sabariah Ahmad obtained her DDS degree at Universiti Kebangsaan Malaysia (2004) and Doctor in Dentistry in Paediatric Dentistry from UCL Eastman Dental Institute, London UK (2012). She is a Consultant in Paediatric Dentistry.

She worked in the Ministry of Health from 2004, later joined as an academician in a public university for 10 years before joining the private sector. She is the resident consultant in Dental Valet Clinic (Bangi & Shah Alam) and a visiting consultant at KPJ Damansara Specialist Hospital.

Her niche area is oral rehabilitation of early childhood caries and aesthetic dentistry in children as she provides zirconia crowns to young children to preserve the teeth. She is also managing dental trauma, dental anomalies and perform minor surgeries. Dr Nazatul has interest in growth and development, has a collective experience in managing autistic children in various spectrum and other medical problems.

She is the president of Islamic Dental Association Malaysia, a member of Malaysian Dental Association, Malaysian Association of Pediatric Dentistry and International Association of Paediatric Dentistry.

AMEDIX — THE DENTAL CLINIC SETUP SPECIALIST

Long known to be a trusted distributor of innovative dental equipment, Amedix provides everything a dentist needs to start, run, maintain, and scale a clinic.

With over 30 years of servicing multiple returning clients, we are undeniably reliable partners in the field. Our aptitude to understand the distinct needs of each client is as wide-ranging as the industry-recognised dental brands we carry. Whether setting up your first clinic or looking to expand further, our service goes beyond recommending the right equipment and consultation on floor plan design. We are unbiased in **PROVIDING CLEAR PROS AND CONS** of every option to assist in **MAKING THE RIGHT PICK**.

## Why Choose Amedix?

- 1 **SUSTAINABLE BUSINESS PHILOSOPHY** geared towards current market trend and long term vision planning.
- 2 **SERVICE CONTINUITY IN MAINTENANCE** of large installed base of equipment since 1990.
- 3 Common spare parts are **READILY AVAILABLE** due to large inventory being maintained.
- 4 Security for your investment as our philosophy to ensure your **AFTER SALES NEEDS** are met.

## Strong Technical Support Team

- 1 For after sales support, customers report the problem to our **TECHNICAL COORDINATORS** in Headquarter via phone, Whatsapp or email.
- 2 **JOB SHEET IS ISSUED**. All cases are documented for future reference.
- 3 Amedix to send the nearest available **TECHNICIAN FOR THE REPAIR**.
- 4 **FOLLOW UP CALL** to ensure customer satisfaction.

Price is subject to change without prior notice. T&C apply.

## Pre-Installation Support

- MULTIPLE FLOORPLAN DRAWINGS**
  - 1 Layout plan for UKAPS
  - 2 Piping, electrical and network
  - 3 X-ray room
- SITE VISIT**
  - 1 Dental junction box marking
  - 2 Inspection of utilities prior to concealment

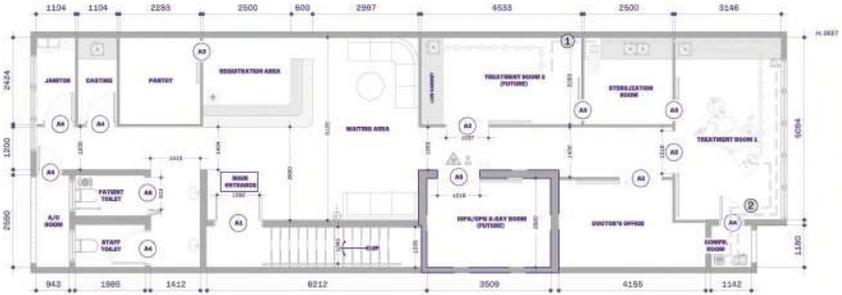

## Equipment License Application

- 1 Autoclave
- 2 Compressor
- 3 Intraoral X-ray
- 4 Panoramic 2D OPG X-ray
- 5 3D CBCT X-ray

## Periodic Preventive Maintenance (PPM)

- 1 Calibration
- 2 Maintenance kit
- 3 Function testing
- 4 Equipment cleaning

- ① Single drain pipeline to the nearest sewerage points
- ② Water inlet pipe

## We are the solutions to your dental clinic —

For healthcare professionals only

## Piezo Tip System

### UNIVERSAL TIPS — SCALING

Simple, gentle and efficient supragingival calculus removal in all quadrants.

1U

For coarse depuration of supragingival calculus.

code: 05076200

ref: 340

2U

For fine depuration of supragingival calculus, as well as for the treatment of root caries.

code: 05076300

ref: 365

3U

For polishing to remove supragingival calculus, particularly suitable for interdental cleaning.

code: 05368200

ref: 425

4U

For coarse depuration of supragingival calculus, in particular for the removal of large areas of calculus.

code: 05848201

ref: 390

### RESTORATION TIPS — RESTORATION

The tips are the perfect addition to your straight and contra-angle handpieces. Due to the diamond coating a high abrasion performance is achieved.

1R

Expanding of fissures.

code: 05849401

ref: 510

2R

Diamond tip. Preparation of the veneers for clearly defined edges of preparation with maximum protection of the adjacent tooth.

code: 06368400

ref: 575

3Rm

Partly diamond coated tip. Preparation for the mesial surface.

code: 06368500

ref: 575

3Rd

Partly diamond coated tip. Preparation for the distal surface.

code: 06368600

ref: 575

### PERIODONTOLOGY TIPS — PARO

Its slender design facilitates optimum and also atraumatic access to the periodontal pockets.

\* FOR SUPPLEMENTARY PERIODONTITIS TREATMENT (OPT., BUCCAL AND INFRA-ALB. MANAGEMENT).

1P

Removal of subgingival deposits, particularly suitable for deep periodontal pockets.

code: 05370400

ref: 510

3Pr

Right angled pario tip. Recommended for maintenance of moderate & deep pockets & furcations.

code: 06364900

ref: 680

3Pl

Left angled pario tip. Recommended for maintenance of moderate & deep pockets & furcations.

code: 06365000

ref: 680

11 Implant-clean

Tip to the soft tissue & careful cleaning of implants & the attendant restorations.

code: 06364500

ref: 610

4P

Diamond tip for efficient cleaning of the root surface.

code: 07968670

ref: 750

5Pr

Right angled tip with diamond coating for efficient cleaning of the root surface.

code: 07968600

ref: 815

5Pl

Left angled tip with diamond coating for efficient cleaning of the root surface.

code: 07968620

ref: 815

5P

Diamond tip for efficient cleaning of furcations & concavities.

code: 07968600

ref: 815

### ENDODONTIC TIPS — ENDO

W&H offers the perfect range of endo tips whether for flushing a root canal or complex revision in an endodontic patient.

1E

Best routing instrument for the irrigation of the end of the root canal preparation.

code: 05367900

ref: 600

2E

Tip for the lateral condensation due to thermal effect.

code: 06368600

ref: 460

3E

Removal of block instruments in the root canal.

code: 05368100

ref: 600

4E

Preparation of the pulp chamber.

code: 07812300

ref: 650

5E

Widening and removal of root canal posts.

code: 07812400

ref: 600

6E

Removal of root canal filling & root canal calcifications.

code: 07812500

ref: 600

## Dentists' best tool for completing successful treatment

Endodontist | Periodontist | Orthodontist

With the press of a button, the oral rinse tumbler instantly converts tap water into natural aqueous OZONE water. It is a safe and powerful NATURAL SANITIZER for oral rinsing that is effective at reducing oral germs and helps improve oral hygiene by promoting healthy microbiome.

### KEY FEATURES

- ▲ Inspired by nature — **REQUIRES ONLY POTABLE TAP WATER.**
- ▲ Portable — fully integrated and easy to use anywhere and anytime.
- ▲ Safety — no chemical and 3rd party tests passed.
- ▲ Easy to charge — **USE TYPE-C CHARGING.**

### SPECIFICATIONS

MODEL NO.	E097100-P
O <sub>3</sub> CONCENTRATION <sup>1</sup>	UP TO 2.0 PPM
RESERVOIR SIZE/COVERAGE	150 ML (5 OZ)
CHARGING TIME	60 MINUTES
WATER QUALITY	CLEAN TAP WATER <sup>2</sup>
WATER TEMPERATURE	5 - 39°C (41 - 99°F)
DIMENSIONS	53 X 168 MM (D2.1 X H6.6 IN)
WEIGHT	250G (0.6 LBS)
LIFE SPAN	3 YEARS OR MORE

<sup>1</sup> Meaning total oxidation concentration as equivalent to dissolved OZONE in water. Tested with soft clean water (TDS = 200 ppm, temperature = 20°C) OZONE concentration varies depending on conditions such as water quality or temperature.

<sup>2</sup> Potable water (recommended water quality: TDS < 80 ppm, Hardness < 180 ppm (as CaCO<sub>3</sub>). Minimum TDS ≥ 30 ppm is required for basic performance). If hard water is used (hardness > 180 ppm as CaCO<sub>3</sub>; TDS > 250 ppm), regular cleaning with citric acid solution is recommended for maintaining performance.

For healthcare professionals only

LASER VENEER DEBONDING WORKSHOP

# “How Er,Cr:YSGG Laser Debond Veneers — Unveiling the Secret” by Dr. Ibrahim Samir

DATE. **18 May 2024**

TIME. **8 am – 5 pm**

VENUE. **Dental City, Wisma Bentley Music**

Elevate your practice reputation and clinical skills with our exclusive hands-on demo session featuring Biolase All Tissue Dental Laser. Dr. Samir will share the intricacies of soft tissue application with the erbium YSGG laser especially in the area of aesthetics. This is an opportunity to expand the possibility for what you can do on a daily basis.

**FOR REGISTRATION. 03 5669 4848 (AMEDIX) WORKSHOP FEE. RM 1,200 PER DENTIST**

LIMITED TO 20 DENTISTS ONLY

EXCLUSIVE HANDS-ON LASER DEMO SESSION

**ABOUT DR. IBRAHIM SAMIR**

- Bachelor's Degree of Oral and Dental Medicine (B.D.S) from Misr International University in Cairo – Egypt.
- Mastership of Laser Therapy in Dentistry Program in Aachen Dental Laser Center (AALZ), RWTH Aachen University – Germany in 2016.
- Laser safety officer from (AALZ) in 2016.
- Fellow of World Academy for Laser Education in Dentistry (WALEED) in 2016.
- Member of International Society for Laser Dentistry (ISLD) Organization since 2016.

Dr. Ibrahim successfully inaugurated the dental laser center of Dr. Nour dental clinics in Cairo, Egypt and he is the director of this dental laser center since 2017. He has been practicing laser dentistry since 2017 and specialized in dental aesthetic treatments utilizing laser technology. He initiated a laser dentistry continuing educational program in Dr. Nour Academy in 2020, training 30 candidates yearly. He shares knowledge in laser science as a speaker with colleagues on a yearly basis in the ISLD congress.

# Durability & confidence that lasts

**REDEFINED, RE-IMAGINED, AND IMPROVED.**

A better, simpler, stronger removable overdenture attachment innovation.

- A STRONGER, DURATEC® ABUTMENT COATING** — 30% increase in strength, 25% greater wear resistance, and nearly 65% reduction in surface roughness.
- A EASIER DENTURE SEATING WITH PIVOTING TECHNOLOGY** — patented modifications to the denture attachment housing now allow the housing to pivot up to 30° over the seated LOCATOR R-Tx nylon retention inserts, eliminating the need for pre-angled abutments.
- A DRIVE MECHANISM** — industry standard .050"/1.25 mm\* hex drive mechanism simplifies placement.
- A CUSTOMISED RETENTION INSERT TOOL** — dual-sided tool for easy insertion and removal of the LOCATOR R-Tx retention insert.

**STANDARD RANGE RETENTION INSERTS**

Zero (Gray) Low (Blue) Medium (Pink) High (Clear)

**ABUTMENT ORDERING INFORMATION**

To order, you will need the following information:

- Name of the implant system
- Implant Diameter
- Connection type & platform diameter
- Tissue measurement (at the highest point)

**SELECTING THE PROPER CUFF HEIGHT OF ABUTMENT.**

Using a periodontal probe, measure from the top of the implant to the highest point of the gingiva.

Select the cuff height of the LOCATOR R-Tx Abutment that corresponds to that measurement e.g. if the measurement is 2 mm, select the 2 mm cuff. If the measurement is 2.5 mm, select the 3 mm cuff. An additional 2 mm of Abutment height will extend above the gingiva to accommodate for the Denture Attachment Housing and Retention Insert.

# VistaScan Mini Easy 2.0

## Plug into the future

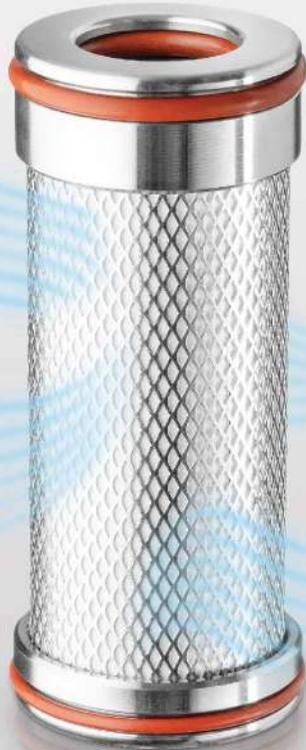

Website

Get your practice ready for the future with the new VistaScan Mini Easy 2.0. Not only is the design trendsetting; the technology hidden behind it is state-of-the-art. It uses the most up-to-date IQ imaging plates and permits many new AI functions. Together with superior image quality, thanks to PCS technology it makes your practice sustainably ready for the future. [More at www.duerdental.com](http://www.duerdental.com)

 **DÜRR  
DENTAL**  
THE BEST, BY DESIGN

Small component. 99.99995%\* effect.  
 Hygienic compressed air 100% as standard.

Choose the Silver Airline compressor now or retrofit a virus-bacteria filter.

The Dürr Dental virus-bacteria filter in the membrane drying unit is a high-performance particulate air filter in filter class ULPA U16 achieving a retention rate of 99.99995%\*. This means that the standard virus-bacteria filter in Silver Airline compressors is far superior to conventional fine filters. For more information please visit [www.duerredental.com](http://www.duerredental.com).

\*Test results from 29.06.2020 recorded by the SGS Institut Fresenius GmbH confirmed a retention rate of >99.99995% for particles (e.g. glass of size 0.1). This corresponds to ULPA U16 according to EN 1822-1:2019/10 to ISO 6534 according to ISO 29463-1:2017. A retention rate of >99.9945% was recorded for microorganisms with real virus P=α174 (size 21)-30 nm.

### Who are they?

Our **1000 Smiles** participants who decided to **continue the journey** with us after completed the **15 days trial**.

### Inquiries

Please contact our local representative or Ndent sales personnel for any further inquiries and details.

**Dear Our 1000 Smiles Members,**

Thank you for your trust and supports in our brand and campaign.

**1000 Smiles** had reached far beyond our expectations and now we are extending this program to other countries too!

it's not just free sampling, it's a trust based campaign, real-time B2C simulation and society give backs!

This achievement is almost impossible to imagine without you being part of it.

As promised, we look forward to grow together with you in 2024.

Thank YOU!

**Stop Air Embolism !**

Air embolism during dental surgery or treatment can cause danger such as face swelling, cardiac and respiratory failure.

# WHY SEPTANEST (ARTICAINE)?

Septanest 4% 1.7ml  
Articaine Hydrochloride with  
Adrenaline 1:100,000

## SAFER

Septanest is safer than other local dental anaesthetics, because the half-life is much shorter - average 30 minutes compared to average 90 minutes. Metabolism primarily in the blood serum not in the liver.

## AMIDE

Has the excellent qualities of an Amide with much less risk of allergic reactions than esters. Tissue penetration unlike any anaesthetic currently available.

## FASTER EXCRETION

Means greater safety.

## EFFECTIVE

It often works when and where other local anaesthetics don't. Penetrate hard tissue (bone) better and is ideal for:

- Blocks
- Difficult areas such as palatal roots on maxillary posterior teeth
- Infiltration on mandibular adult teeth
- Extractions of impacted molars and implants

## SUCCESS

The excellent tissue penetration results in higher success rates of anesthesia in infected areas with less anaesthetic injected.

## TOP IN THE WORLD

Septodont supplies anaesthetic to over 100 countries in the world and over half of all production is Articaine - it must be popular for a reason!

Digital shade determination

# VITA Easyshade® LITE

The One-Click Shade Guide. Results in a matter of seconds.

VITA Easyshade LITE enables easy and fast digital shade determination for natural teeth, using the proven VITA classical A1-D4 and VITA SYSTEM 3D-MASTER shade systems.

**NEW!**  
VITA Easyshade® LITE

## The benefits of just one click

### Fast

The measured tooth shade is shown in seconds on the display. Deviations in the natural tooth shade from the VITA shade guide are visible at a glance.

### Easy

Digital shade determination with the compact, ergonomic VITA Easyshade LITE device is incredibly easy – just one click, and no previous experience or background knowledge is required.

### Precise

The tooth shade is precisely determined, thanks to high-precision spectrophotometer technology. Objective and reproducible, regardless of the ambient lighting.

**VITA Easyshade® LITE**

## The One-Click Shade Guide.

**MOST OUTSTANDING RESELLER IN MALAYSIA**

FOLLOW US | @SHINING3DMALAYSIA

**We are grateful for the trust and support of our customers and partners and look forward to continuing to grow and innovate with Shining 3D. Our achievements are a testament to our excellent service and commitment to advancing digital dentistry.**

In just two years, Shining 3D has achieved significant milestones, facilitating the transformation of over 300 clinics into digital dentistry practices. This transformative journey commenced in 2022, marked by Ortho Dental Supply's accreditation as an advanced trainer by Shining 3D HQ and its subsequent elevation to an esteemed reseller of Shining 3D products. By March, our status ascended to that of a gold reseller, further reinforced in April with our attainment of titanium reseller status, thereby enhancing our ability to meet the diverse needs of the market. The culmination of our efforts was epitomized in October when we were honored with the prestigious Global Outstanding Achievement Award from Shining 3D, underscoring our unwavering dedication and diligence. Most recently, in November, we were privileged to attain platinum reseller status, highlighting our commitment to delivering exceptional products and services.

## BloodSTOP<sup>®</sup>

CONTROLS BLEEDING FAST

ADVANCED SURFACE WOUND CARE HEMOSTAT

Stops bleeding fast: upon contact with blood, turns into gel to seal the wound

Accelerates clot formation, easily inserted into tight oral spaces

The gel prevents contamination and creates moist environment to promote healing

Bone harvested from palatal tori

Bloodstop is placed over without suturing the wound

Bleeding stop after 1 hour

### CASE BY DR. GABRIEL SIA

BONE HARVESTED FROM PALATAL TORI

THE MOST **blue m**  
ELEVATING  
oral care brand in the world.

Find us in MIDS 2024 & CHOP here.....  
 To get 1 piece of Scorpion EMS Scaler Tips (Tips A) with  
**RM288** only !!  
 and also get a **FREE** excavator when you purchase  
 this offer ! \*While stock lasts\*

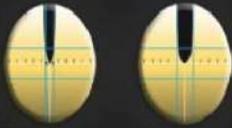

Universal  
scaler tip

Visual wear  
indicator

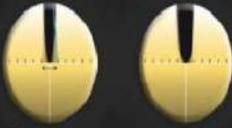

The Scorpion insert tip is coated with a 2 µm thick and strong titanium nitride layer. To maintain efficiency and for patient comfort the insert has to be changed when the titanium coating has disappeared

Very thin

Scorpion tip reaches interproximal spaces without difficulty

Very powerful

A strong cavitation is guaranteed even with a low power scaling device

### Scorpion Scaler Tips

## The Only Regional Dental Industry Association Representing ASEAN and Asia-Pacific Regions

Association Members:

Malaysia • Philippines • Chinese Taipei • Indonesia • Australia

## ABOUT US

The Asia Pacific Dental Industry Association (APDIA) is a result of the collaborative alliance that originated when the Malaysia Dental Industry Association (MDIA) invited National Association of Dental Traders, Inc. (NADTI) and Taiwan Dental Traders Association (TDTA) to join in 2017 and 2018, respectively. They signed the 1st Memorandum of Understanding (MOU) on Asia Pacific Dental Trade Co-operation (APDTC) in 2019, and the 2nd MOU, including Perkumpulan Industri Kesehatan Gigi & Mulut Indonesia (PERIGI) in 2021. Australian

Dental Industry Association (ADIA) joined in 2023 by membership.

Officially established on July 14, 2023, APDIA aims to foster cooperation among dental industry association in the Asia Pacific and ASEAN regions. The association is governed by a dedicated Council Members with membership open to Asia Pacific countries. Under the leadership of Ms. MA Lourdes Jimenez-Villaroman as President, APDIA strives to drive innovation and collaboration for dental industry growth throughout the Asia Pacific region.

## OUR OBJECTIVES
